

Symposium on Spatial Data Handling

(14&15 August 2020, Sakarya-Turkye)

Convener: Mehmet Fatih Döker, Sakarya University Geography Department

The International Symposium on Spatial Data Handling (SDH) is the biennial international research forum for Geospatial Information Science, organized by the Commission on Geographic Information Science. The 19th International Symposium on Spatial Data Handling (SDH) hosted by the Sakarya University, Department of Geography.

The symposium aims to discuss issues on (but not limit to):

- Spatial Data Handling for Smart Transportation Systems
- Spatial Data Handling for Environmental Monitoring and Waste Management
- Spatial Data Handling for Smart Urban Growth
- Enhancing sustainability, accessibility and livability
- Remote Sensing & GIS Applications in Earth Systems
- Data Mining & Knowledge Discovery
- Geovisualization
- Spatial Analysis
- Deep Learning
- Data Structure & Data Representation
- Spatial Cognition
- Ecology and Ecosystems
- Climate Change & Sustainability
- Renewable Energy
